Email: nikita.markovskii@icloud.com

Languages: Hebrew(advanced), English, French, Russian

Senior Full-Stack Software Engineer with 7+ years of hands-on experience delivering production-grade web applications across the full lifecycle — from database schema and REST API design to responsive React interfaces and AWS deployment. Strong command of TypeScript, React, Node.js, Express, PostgreSQL, Docker, and CI/CD pipelines. Proven record of building secure authentication flows (JWT, OAuth 2.0), role-based access control, microservice integrations, and high-performance dashboards used by hundreds of end users. Comfortable in Agile/Scrum teams, focused on clean architecture (SOLID, DRY), measurable code quality, and shipping reliable features on schedule.

Skills

Languages & Core Technologies: TypeScript, JavaScript (ES6+), Node.js, HTML5, CSS3, SQL, Bash.

Frontend: React, TypeScript, Redux Toolkit, React Query, Context API, MUI (Material UI), Vite, Responsive UI, Component-Based Architecture, SPA (Single Page Application).

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication (access/refresh tokens), OAuth 2.0 / SSO, WebSockets, Microservices, MVC, RBAC, HttpOnly Cookies.

Databases & Data Layer: PostgreSQL, MongoDB, Prisma, Mongoose, Redis, SQL / NoSQL, ORM / ODM, JSON, Schema Design, Query Optimization.

Cloud & DevOps: Docker, CI/CD (GitHub Actions, AWS Amplify), AWS (EC2, S3, Lambda, DynamoDB, RDS, ECS, CloudWatch, IAM, VPC), YAML, Linux / Bash, Winston Logging.

Tools, Testing & Methodology: Git / GitHub, npm, Vite, Postman, Swagger / OpenAPI, Jest, Chrome DevTools, VS Code, WebStorm, Jira, Trello, Confluence, Miro, Agile / Scrum, Code Review, SOLID, DRY, KISS.

LLM & Generative AI: OpenAI (ChatGPT, GPT-4.5), Claude, Gemini; prompt engineering, workflow automation, AI-assisted development.

Experience

2024 - Present | Senior Full-Stack Developer | Optisor LTD (TLV, Israel)

Delivering an end-to-end smart-locker booking platform across 10+ cities: a TypeScript/React dashboard backed by Node.js/Express + PostgreSQL, deployed on AWS within a 10+ developer Agile team on bi-weekly release cycles.

Built a React + TypeScript dashboard with RBAC for 4 user tiers and real-time monitoring for a network of 160+ lockers across 10+ cities using React Query, achieving under 2s initial load time and delivering a responsive role-aware user experience.

Integrated 65+ RESTful API endpoints and contributed to data-model design ensuring consistent request/response contracts; maintained Swagger/Postman/Confluence documentation to reduce integration blockers across product teams.

Implemented JWT authentication with access/refresh token flow via HttpOnly cookies, improving session stability and protecting against XSS-based token theft; integrated Stripe for real-time payment processing at the moment of booking.

Expanded Jest test coverage to 45%, reviewed 3-5 PRs per week to maintain code quality, and shipped releases through CI/CD pipelines on AWS Amplify/EC2 cutting deployment time by 2x and enabling repeatable releases.

Technologies: TypeScript, React, Vite, Node.js, Express, Prisma, PostgreSQL, Docker, Winston, JWT, MUI, AWS Amplify, EC2, S3, YAML, GitHub Actions, npm, Jira, Trello, Miro, Confluence.

LLM & Generative AI: OpenAI (ChatGPT, GPT-4.5), Claude, Gemini; prompt engineering, workflow automation, AI-assisted development.

2019 - 2024 | Full-Stack Developer | Luxoft (Zug, Switzerland)

Maintained and scaled a Node.js web application serving financial market clients, working within a 50+ developer team across both monolithic and microservices architectures.

Designed and validated RESTful APIs with Postman, conducted code reviews to catch and resolve bugs early, and maintained technical documentation to eliminate integration blockers across teams.

Containerized services with Docker and configured CI/CD pipelines via GitHub Actions, cutting bug reproduction time by 40%, reducing onboarding time by 2x, and enabling automated deployments on code changes.

Expanded Jest test coverage by 35%, implemented structured logging with Winston for improved observability, and delivered critical releases on time by coordinating overtime with tech lead and project manager.

Technologies: TypeScript, React, Node.js, Express, Docker, Jest, Postman, PostgreSQL, MongoDB, REST API, Git, MUI, npm, Jira, Confluence, GitHub Actions, Jira, Trello, Miro, Confluence, OpenAI (ChatGPT, GPT- 4o, GPT- 4.5), Claude, Gemini; prompt engineering, workflow automation, AI-assisted development.

Education

2006 - 2011 MSc in Computer Science

N. A. Nekrasov Kostroma State University (Kostroma, Russia)
